

# Design Advance - Bootstrap Layout

- Aditya Kumar  
Chief Technology Officer, [edwisor.com](https://edwisor.com)

# We will cover with the following concepts

- 1) Grid system for better responsiveness
- 2) Other important layout component
- 3) Bootstrap Navigation

# Layout responsive is a piece of cake with bootstrap

- <https://getbootstrap.com/docs/4.0/layout/overview/>
- You can use the combination of responsive breakpoints and grid system to ensure responsiveness of your web page
- Let's see an example of this.

# Bootstrap navigation is the coolest!

- <https://getbootstrap.com/docs/4.0/components/navs/>
- <https://getbootstrap.com/docs/4.0/components/navbar/>
- Lets apply navbar and layout to create the base of our website.

## Next Steps -

- 1) Content classes
