

Design Basics - Content Classes

- Aditya Kumar
Chief Technology Officer, edwisor.com

We will cover with the following concepts

- 1) What are content classes?
- 2) Important content classes - Responsive images, tables and Figures
- 3) Applying content classes in our layout

Content Classes allow powerful features in normal HTML elements

- To make the images responsive -
<https://getbootstrap.com/docs/4.0/content/images/>
- To create different kind of tables -
<https://getbootstrap.com/docs/4.0/content/tables/>
- To create figures with caption -
<https://getbootstrap.com/docs/4.0/content/figures/>

Lets apply these classes in our design

- We will create the initial contents of the page and apply these classes.

Next Steps -

- 1) Bootstrap components.
