Jquery Advance - Data from API

- Aditya Kumar
  Chief Technology Officer, edwisor.com

edWisor

We will cover with the following concepts

1) Communicating with Facebook API

2) Using Facebook API to fetch the profile data.

3) Handling the response received

The structure of request remains same, with one change

1) We will use the Facebook API url instead of the filename.

It's time to handle the response

1) Success

2) Error

3) Timeouts

Next Steps -

1) Plugins
